As a business operating in the customer dimension, we structure our business in such a way that we do not need to reinvent our relationship with you. We encourage customer loyalty by showing you that we are prepared to let you teach us how to serve you.

Growing by leaps and bounds daily, the internet is proving to be one of the most cost effective advertising mediums with which a company can reach international or local markets. Not restricted to advertising alone it can be an impressive way to distribute information, price lists and visual information about your products, to existing as well as potential clients, resulting in not only client confidence but client service and satisfaction as well.

A professionally unique computer solutions team primarily focusing on promotional, data security and cost effective Internet accessibility issues. We truly distinguish ourselves by exceeding client expectations, and are committed to informing and assisting individuals, organisations and businesses to understand and achieve a professional internet presence delivering growth at affordable prices.

We pride ourselves in designing quality websites for our clients. Following onsite discussions and understanding your web presence objective we will be able to present your companies image professionally, ensuring client confidence. Emphasis will be placed on simple navigation, minimal download times, ease of use, legibility and impact together with attractively and tastefully integrated customer content and graphics.

Our success is measured by the value we can add to your business.

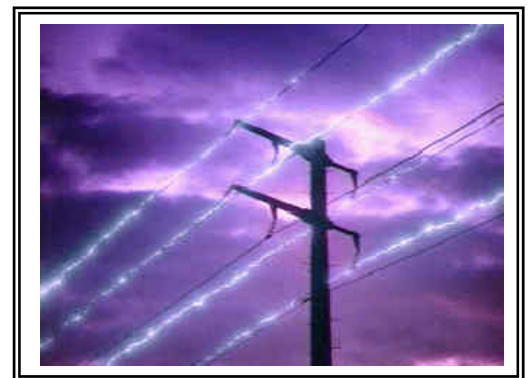

Designing to attract visitors to your site, keep them browsing and promote sales for you

How we work with you:

No one knows your products, services and clients better than you. In the early stages, we prefer to work very closely with you to understand you your company it products and target market. Together we brainstorm ideas ultimately leading up to a successful design result, meeting most of you or your companies Web site development objectives.

Discussion topics to include:

- Hosting Options and the costs involved
- Website content
- Real-time or Offline update issues
- Website promotion on local or International search engines
- Investment analysis and costs involved
- e-Mail account creations, Maintenance & Statistic issues

Website content:

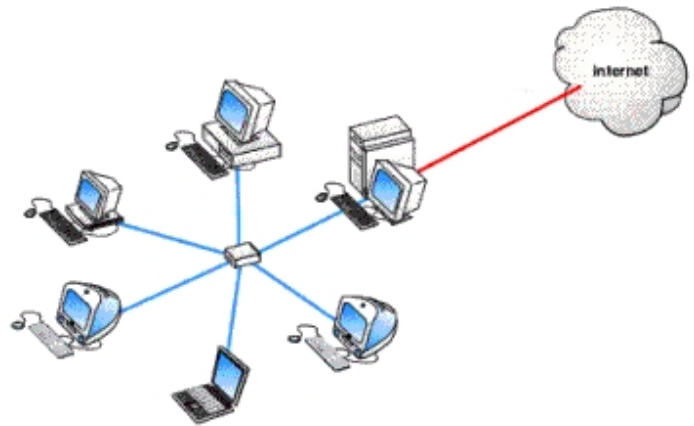

The choices that one is faced with are endless, as no websites are the same. Your website may contain as much or as little as you wish, however one needs to be aware of the overdone, ridiculous and bizarre issues that exist. Choices will need to be made and only together with your ideas and our broad knowledge of design issues and limitations will we be able to amicably find a solution.

Being an informative and successful company, we need to bear all issues in mind and in turn strive to meet your objective

Did you know?

Your website may embrace the following:

- In-house or wide area administrative tasks (Pricing, Pictures, documentation etc..)
- Brochure, Document & Technical Libraries
- Newsletters & Promotions
- Multiple forms & Questionnaires
- Portfolios
- Photographic galleries
- URL links to other websites
- Slideshows / Powerpoint presentations
- Banner-Ads
- Ad-hoc or pre-determined facts, sayings, quirks, jokes, pictures etc. etc.
- Customisable statistics (if Hosted by Webonline)
- Video clips

These are only but a few of the many ideas and choices available. All you need to do is ask and we will investigate any practical, logical and programming issues, based on your request.

Payment terms.

Completion date – Dependant on input from yourself and our current workload

Understandably, we can only commence work after receiving a 50% deposit with a 40% payment on delivery and the remaining 10% after minor amendments have been addressed.

In anticipation We look forward to designing your website, however should you wish to query any of the above, kindly contact us.
